AL AMEEN KH

Client IT Head | IT Service Delivery & Client Technology | Consulting

Bangalore, India | +91 8113871897 | +91 8848277392 | alameenkh7@gmail.com | LinkedIn: https://www.linkedin.com/in/al-ameen-kh | GitHub: https://github.com/alameenkh7

SUMMARY

Technology leader and founder with 10+ years leading engineering delivery for clients across the UAE, Saudi Arabia, USA and India. Bridges engineering teams and business stakeholders — owning SLAs, escalations, multi-account delivery and release outcomes. Founder of Rearway Technologies (Estative Dubai, Platio Saudi, and other international products); prior Tech Lead at Deltasoft Consulting. AWS Certified Solutions Architect – Professional.

CORE SKILLS

- **Client & Service Delivery:** stakeholder management, SLA ownership, escalation handling, multi-account / multi-client delivery, requirements-to-release ownership, consulting engagement delivery
- **IT Leadership:** cross-functional team leadership, engineering–business bridge, delivery planning, vendor/client coordination, product and platform ownership
- **Cloud & Architecture:** AWS (ECS, Lambda, RDS, EKS), GCP (Cloud Run, BigQuery, Pub/Sub), multi-tenant platforms, API Gateway (Kong), Terraform, Kubernetes, Docker, CI/CD
- **Security & Identity:** IAM (Casdoor, Keycloak), OAuth2, RBAC, SSO, WAF, TLS; secure multi-tenant isolation
- **Platforms & Data:** microservices, event-driven systems (Kafka), PostgreSQL, Redis, BigQuery; Node.js / TypeScript / NestJS, Golang
- **AI / Support Ops:** Resolve AI support agent (RAG, LangGraph, MCP) for SME customer support workflows

PROFESSIONAL EXPERIENCE

Rearway Technologies (founder) and Eximietas Design (full-time) are held concurrently.

Founder & Technical Lead — Rearway Technologies, Kerala

Aug 2023 – Present (concurrent with Eximietas Design)

- Own end-to-end client delivery for products serving UAE, USA, Saudi Arabia and India stakeholders: Estative (real estate, Dubai), Proppz (social media, Florida), Platio (kitchen & food delivery, Saudi Arabia), and Dr Shafi Clinic (appointment booking with AI-optimized scheduling).
- Act as the primary technical counterpart for international clients — translating business requirements into delivery plans, owning release outcomes, and coordinating engineering with client stakeholders across time zones.
- Building **Resolve**, an AI customer-support agent for Indian SMEs (RAG, LangGraph, LangChain, MCP), aimed at reducing support load and improving response SLAs for SME clients.

Senior Technical Lead — Eximietas Design, Bangalore

Sep 2025 – Present (concurrent with Rearway Technologies)

- Led client delivery for **Zebra**: re-architected a multi-tenant billing platform, cutting the cost of processing ~500M billing records to about $200 — a direct client cost and scalability outcome.
- Owned delivery of scalable BigQuery APIs and login/logout event-history capabilities, load- and scalability-tested at ~500M records before customer release; coordinated engineering with client acceptance criteria.
- Lead infrastructure architecture and the engineering team for **Xpedioo**, a multi-tenant UEM and workflow-automation platform on 11+ microservices; set delivery standards across Golang and Node.js services for reliable multi-account operation.
- Drove IAM (Casdoor), Kafka-based tenant isolation, Kong API Gateway and Cloud Run + Terraform deployments — improving security posture, tenant separation and operable service delivery for enterprise clients.
- **Tech:** Golang, Casdoor, Kafka, Kong, Node.js, NestJS, TypeScript, BigQuery, GCP Cloud Run, Kubernetes, Terraform, Docker

Tech Lead — Dealbuddy, Remote

Jun 2024 – Sep 2025

- Owned delivery of the Dealbuddy platform from scratch to 200K active users, architected for 100K+ concurrent users on AWS ECS, Lambda and RDS — accountable for scale, reliability and release readiness.
- Established secure service delivery with WAF, OAuth2, RBAC and API Gateway; led full-cycle mobile release (App Store & Play Store) and CI/CD so client-facing apps shipped on predictable cadences.
- Delivered analytics and fraud-detection capabilities (Golang, Kafka) that protected platform integrity and supported operational monitoring for a high-traffic consumer service.
- **Tech:** Golang, Node.js, NestJS, PostgreSQL, Redis, Kafka, Docker, AWS (ECS/Lambda/RDS), Terraform, Firebase, Service Mesh, React

Tech Lead — Deltasoft Consulting Pvt Ltd, Remote

May 2023 – Jun 2024

- Delivered consulting engagements as Tech Lead at **Deltasoft Consulting**: spearheaded **WebRavo**, a modular back-office CMS built from scratch with NestJS microservices, released on Kubernetes for consulting clients.
- Implemented Keycloak-based RBAC, version-controlled template editing and CI pipelines — enabling secure, repeatable delivery across multiple client applications.
- Built a shared Casdoor-based auth/RBAC layer in Golang reused across applications, reducing duplicate auth work and standardizing access control for consulting deliveries.
- **Tech:** NestJS, Golang, Casdoor, Keycloak, Kubernetes, PostgreSQL, GCP, Bitbucket Pipelines, React

Senior Software Engineer – Team Lead — Copado, Remote

Apr 2022 – Jun 2023

- Led delivery of scalable billing systems on NestJS, Kubernetes and service mesh; supported multi-region deployments and gRPC integrations for reliable service operation.
- Built the robot-creation microservice in Golang and enhanced MQTT-based real-time robotics communication for product delivery milestones.

Tech Lead — Naico ITS, Remote

Dec 2020 – Apr 2022

- Owned delivery of client platforms including an Uber-like delivery system with real-time GPS/IoT tracking and Anit-a-Haul logistics tracking (NestJS, Firebase, MongoDB).
- Delivered GraphQL microservices and an admin dashboard for ImpartHealthMedia; architected an investor-focused social media backend for high-concurrency use.

Earlier Experience

- **Senior Full Stack Developer**, Charmboard, Bengaluru (Feb 2019 – Dec 2020) — Built CB Plugin V2 from scratch for the Kaltura Player used by Zee5 OTT (Node.js, Redis); applied MVC and modular service architecture.
- **Full Stack Web Developer**, AssetTrackr (ZF WABCO subsidiary), Bengaluru (Jan 2018 – Jan 2019) — IoT dashboards integrating tyre, fuel and GPS sensors via MQTT and Modbus; real-time visualization with AngularJS, Node.js, AWS.
- **Software Engineer**, FreshToHome, Bengaluru (Jul 2017 – Jan 2018) — Automated inventory and procurement workflows with Vue.js, Node.js, AWS Lambda.
- **Junior Software Engineer**, Global Allies Technologies, Kochi (Jun 2015 – Jul 2017) — Restaurant order systems with PHP, Node.js, MySQL.

OPEN SOURCE

- Published NestJS clean-architecture bootstrap kit, BullMQ wrapper, and an LLM-based AI Code Review Bot (GitHub App) used to accelerate team delivery standards.

EDUCATION & CERTIFICATION

- **B.Tech, Computer Science & Engineering** — NIT Calicut, Kerala (2015)
- **AWS Certified Solutions Architect – Professional** (Aug 2024)
